DETAILED ACTION

Specification

1. The disclosure is objected to because of the following informalities: The headings of each of the subsections is absent. Such as "Background of the Invention," "Brief Summary of the Invention," "Brief Description of the Drawing(s)," ETC. Appropriate correction is required.

Claim Rejections - 35 USC § 101

2. 35 U.S.C. 101 reads as follows:

Whoever invents or discovers any new and useful process, machine, manufacture, or composition of matter, or any new and useful improvement thereof, may obtain a patent therefor, subject to the conditions and requirements of this title.

Claims 1-18 and 24-27 are rejected under 35 U.S.C. 101 as not falling within one of the four statutory categories of invention. Supreme Court precedent¹ and recent Federal Circuit decisions² indicate that a statutory "process" under 35 U.S.C. 101 must (1) be tied to a particular machine or apparatus, or (2) transform a particular article to a different state or thing. This is referred to as the "machine or transformation test", whereby the recitation of a particular machine or transformation of an article must impose meaningful limits

on the claim's scope to impart patent-eligibility (See *Benson*, 409 U.S. at 71-72), and the involvement of the machine or transformation in the claimed process must not merely be insignificant extra-solution activity (See *Flook*, 437 U.S. at 590"). While the instant claim(s) recite a series of steps or acts to be performed, the claim(s) neither transform an article nor positively tie to a particular machine that accomplishes the claimed method steps, and therefore do not qualify as a statutory process. These claims are not tied to a machine nor do they transform any subject matter. The claims do have a camera taking a picture but this does not tie this to a processor/computer/machine carrying out the method nor is there any transformation taking place it is just measuring the rim geometry which can be performed manually. Therefore, these claims are deemed to be non-statutory.
